

Eldorado ED-500

Eldorado ED-500 is an alkaline, water-based, liquid, concentrated cleaner, used to remove oil, exhaust track film, and traffic film from aircraft exteriors. It may also be used for cleaning cabin and baggage areas of aircraft interiors, as well as gas trucks, ground service units, and freight-handling vehicles.

Conforms To

- Military
 - MIL-C-25769

McGean® recommends checking the most recent specifications for updated information.

Benefits

- Concentrated, powerful cleaner.
- Safe on Plexiglas, paint, and electrical insulation.
- Safe on aluminum, magnesium, ferrous alloys, and high-strength steel.

Properties

- Water-based liquid
- No vapor toxicity

Notes Prior to Handling

Before using your Cee-Bee® products, all safety and operating instructions should be read and understood. If you have any questions, please contact your Cee-Bee® representative before proceeding.

Use Procedure

For cleaning prior to application of DesoGel EAP-9 and EAP-12:

Mix 1 part Eldorado ED-500 with 1 part of water. Apply by spray and agitate the surface aggressively with red Scotch-Brite™ pads and then rinse very thoroughly with water.

For heavy-duty cleaning, such as exhaust tracks:

Mix 1 part Eldorado ED-500 with 4 parts petroleum solvent. Air-agitate the mixture to form a thick, creamy emulsion which may be applied by spray, mop, or brush. Allow a few minutes for penetration, then agitate with a brush, and rinse thoroughly with water.

For ordinary aircraft cleaning:

Mix 1 part Eldorado ED-500 with 10 parts water. Apply by spray, agitate with a brush, and rinse thoroughly with water.

For cleaning aircraft interior surfaces:

Mix 1 part of Eldorado ED-500 with 20 parts of water. Apply to surface being cleaned with a rag or window-cleaning bottle (spray-type). Pick up loosened dirt and Eldorado ED-500 solution on a clean, dry rag. No other rinse is necessary. This procedure is used on hard, nonporous surfaces such as metal, wood, and vinyl plastic.

For cleaning upholstery, rugs, and other soft surfaces:

Mix 1 part Eldorado ED-500 with 10 parts' water. Wet a fiber bristled brush well with Eldorado ED-500 solution and agitate the surface vigorously to generate foam. Pick up foam on a clean, dry rag. Normally, this procedure is conducted in such a manner that the fabric surface is wet as little as possible.

Note: Eldorado ED-500 is a powerful cleaner which will defat the skin. Avoid skin contact through the use of rubber gloves.
